

```
std::hash< nlohmann  
::json >::operator()
```

```
graph LR; A["std::hash< nlohmann::json >::operator()"] --> B["nlohmann::detail::hash"]; B --> B;
```

The diagram illustrates a function call. A light gray box on the left contains the code `std::hash< nlohmann::json >::operator()`. A blue arrow points from this box to a dark gray box on the right containing the code `nlohmann::detail::hash`. A curved blue arrow also points from the top of the dark gray box back to itself, indicating a self-call or a loop.

```
nlohmann::detail::hash
```
