

nanort::StackVector
::operator[]

```
graph LR; A[nanort::StackVector::operator[]] --> B[nanort::StackContainer< std::vector< T, StackAllocator< T, stack_capacity > >, stack_capacity >::container];
```

The diagram consists of two rectangular boxes connected by a blue arrow. The left box is shaded gray and contains the text 'nanort::StackVector' followed by '::operator[]' on a new line. The right box is white with a black border and contains the text 'nanort::StackContainer' followed by '< std::vector< T, StackAllocator' on a new line, '< T, stack_capacity > >, stack' on a new line, and '_capacity >::container' on a new line. A blue arrow points from the right side of the left box to the left side of the right box.

nanort::StackContainer
< std::vector< T, StackAllocator
< T, stack_capacity > >, stack
_capacity >::container
