

HF::SpatialStructures
::Node::operator*

HF::SpatialStructures
::Node::operator+

HF::SpatialStructures
::Node::operator-

HF::SpatialStructures
::Node::Node

```
graph LR; A[HF::SpatialStructures::Node::operator*] --> D[HF::SpatialStructures::Node::Node]; B[HF::SpatialStructures::Node::operator+] --> D; C[HF::SpatialStructures::Node::operator-] --> D;
```

The diagram illustrates a mapping from three operator methods to a single Node constructor. On the left, three white rectangular boxes are stacked vertically. Each box contains the text 'HF::SpatialStructures' on the top line and a specific operator on the bottom line: 'operator*', 'operator+', and 'operator-' respectively. Three blue arrows originate from the right side of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'HF::SpatialStructures' on the top line and 'Node' on the bottom line. The arrows indicate that each of the three operators is associated with or maps to the 'Node' constructor.
