

CalculateDistanceAndPredecessor

```
graph LR; A[CalculateDistanceAndPredecessor] --> B[HF::Pathfinding::GenerateDistanceAndPred];
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box is white with a black border and contains the text 'CalculateDistanceAndPredecessor'. The right box is gray with a black border and contains the text 'HF::Pathfinding::GenerateDistanceAndPred' on two lines.

HF::Pathfinding::Generate
DistanceAndPred
