

nanort::IntersectRayAABB
< double >

nanort::IntersectRayAABB
< float >

nanort::safemin

```
graph LR; A["nanort::IntersectRayAABB< double >"] --> D["nanort::safemin"]; B["nanort::IntersectRayAABB< float >"] --> D;
```

The diagram illustrates a common variable 'nanort::safemin' being referenced by two different function templates. The first template is 'nanort::IntersectRayAABB' with a double precision parameter, and the second is 'nanort::IntersectRayAABB' with a float precision parameter. Both templates have blue arrows pointing to the 'nanort::safemin' variable, which is shown in a grey box on the right.
