

nlohmann::basic_json
::get_impl

nlohmann::basic_json
::get_impl_ptr

nlohmann::basic_json
::is_primitive

nlohmann::basic_json
::is_boolean

```
graph LR; A[nlohmann::basic_json::get_impl] --> D[nlohmann::basic_json::is_boolean]; B[nlohmann::basic_json::get_impl_ptr] --> D; C[nlohmann::basic_json::is_primitive] --> D;
```

The diagram illustrates a relationship between four functions. On the left, three white rectangular boxes are stacked vertically. Each box contains the text 'nlohmann::basic_json' on the top line and a function name on the bottom line. The top box contains '::get_impl', the middle box contains '::get_impl_ptr', and the bottom box contains '::is_primitive'. On the right, there is a single gray rectangular box containing the text 'nlohmann::basic_json' on the top line and '::is_boolean' on the bottom line. Three blue arrows originate from the right side of the three white boxes and point towards the left side of the gray box, indicating that the three functions on the left are related to or point to the function on the right.
