

GetEdgesForNode

```
graph LR; A[GetEdgesForNode] --> B[HF::SpatialStructures::Graph::hasKey]
```

The diagram illustrates a function call. A white box on the left contains the text 'GetEdgesForNode'. A blue arrow points from this box to a gray box on the right. The gray box contains the text 'HF::SpatialStructures::Graph::hasKey', indicating that the function 'GetEdgesForNode' performs a lookup in the 'hasKey' method of the 'Graph' class within the 'HF::SpatialStructures' namespace.

HF::SpatialStructures  
::Graph::hasKey
